

TRAVELERS APP STORYBOARD

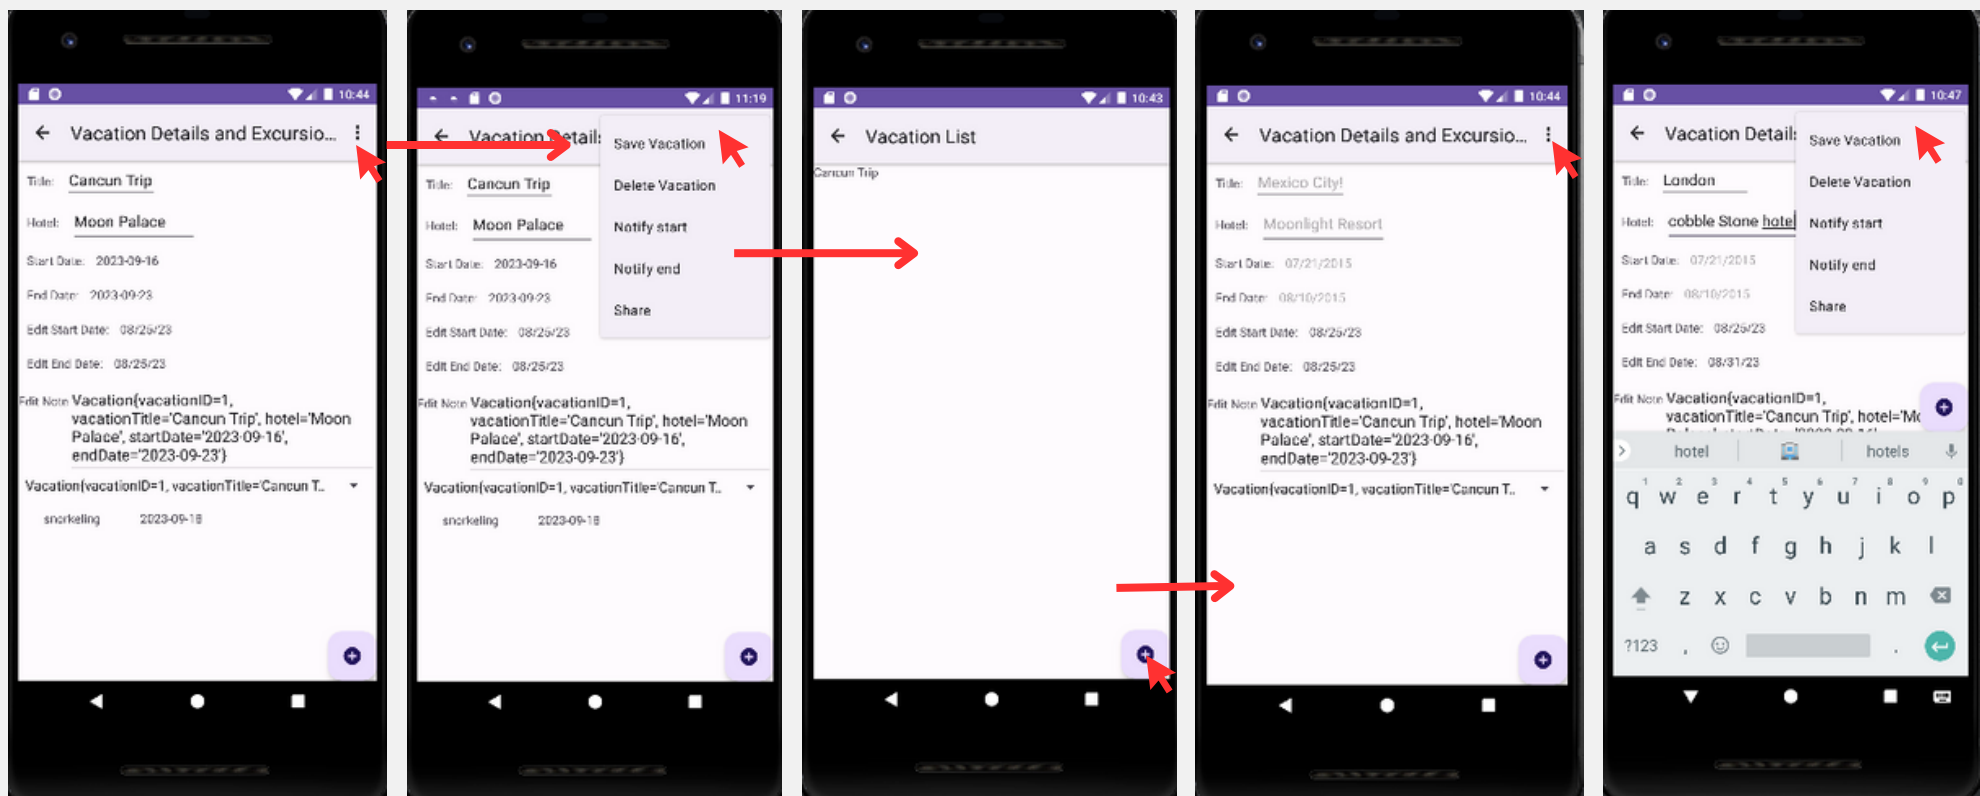

User lands on homepage.

User can click the menu and add sample data. User can click on the 'My Travels' button to get to vacation list

This page is populated with the Cancun trip after clicking add sample data on the previous page. The user can click on the vacation to get to the details screen.

The user can edit vacation information by tapping the text in the title, hotel, edit start date, and edit end date fields.

The user can pick the start/end dates with the date picker calendar and click "OK" when they have selected the desired dates.

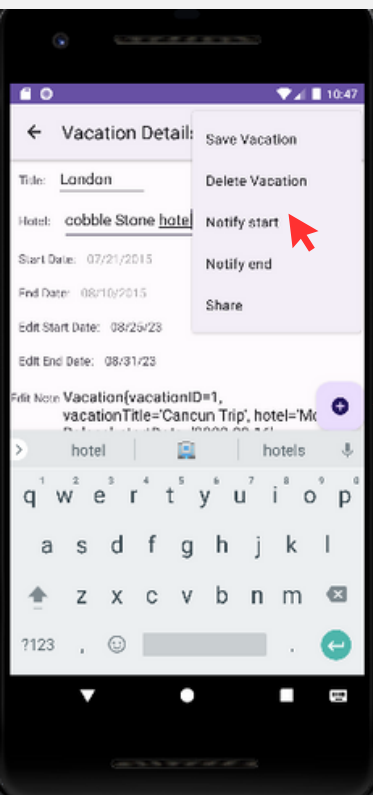

After editing/updating a vacation, the user can click on the menu and save the vacation. Upon saving or deleting, this will then take them back to the vacation list screen. The user is unable to delete a vacation if the vacation has associated excursions and will be notified.

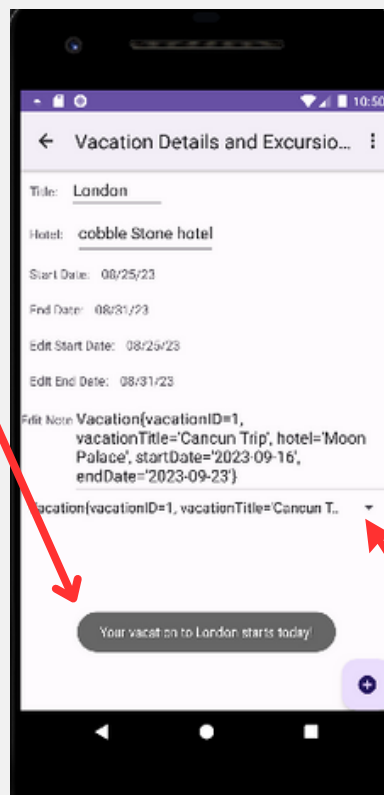

The user can press the floating action button in the bottom right to create a new vacation.

This takes the user to the vacation details screen where they can add the title, hotel, and dates, as shown previously.

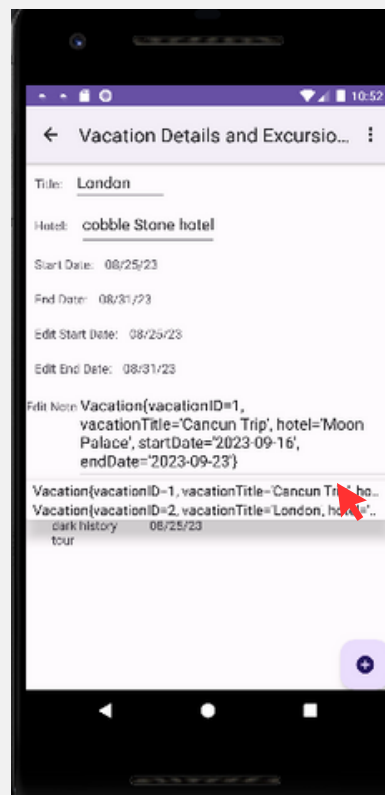

The user can click on the menu to save the new vacation.

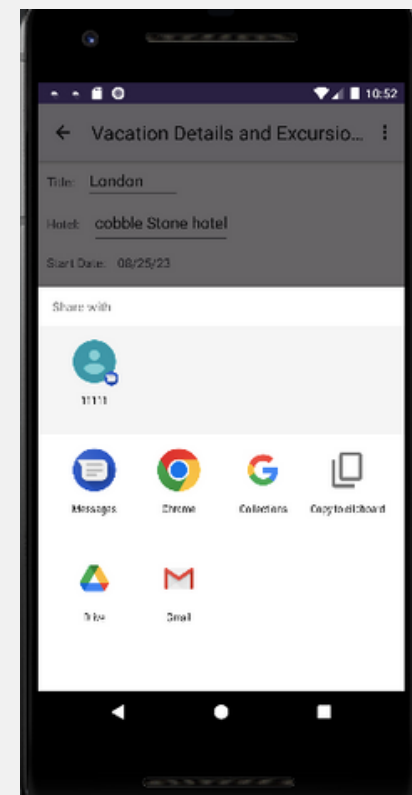

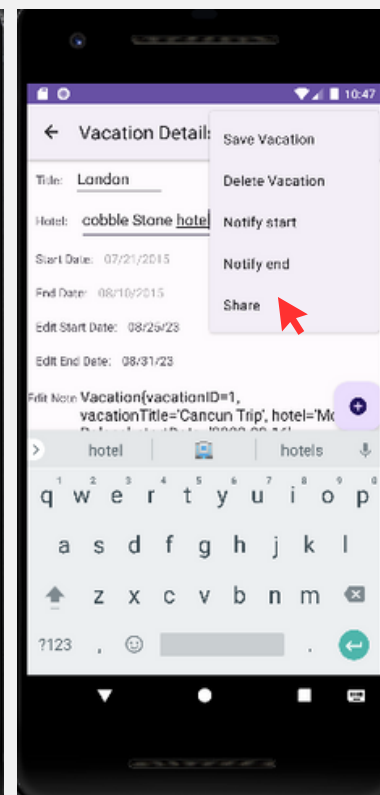

After picking vacation dates, the user can click the menu and press notify start/end.

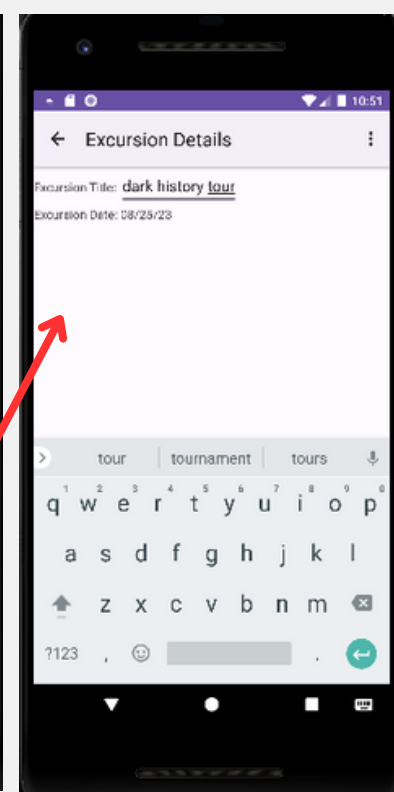

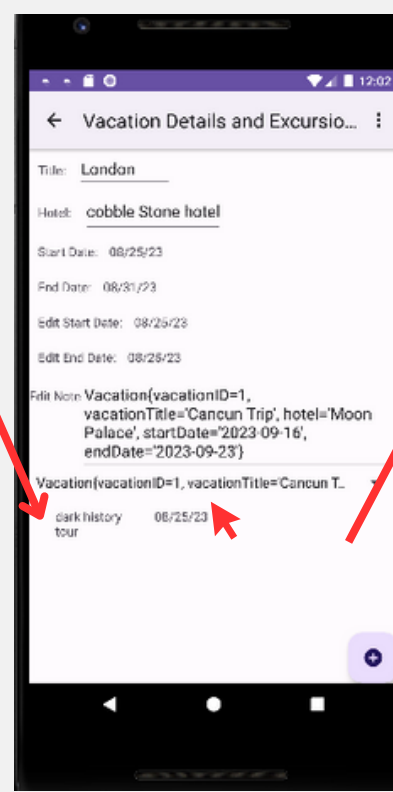

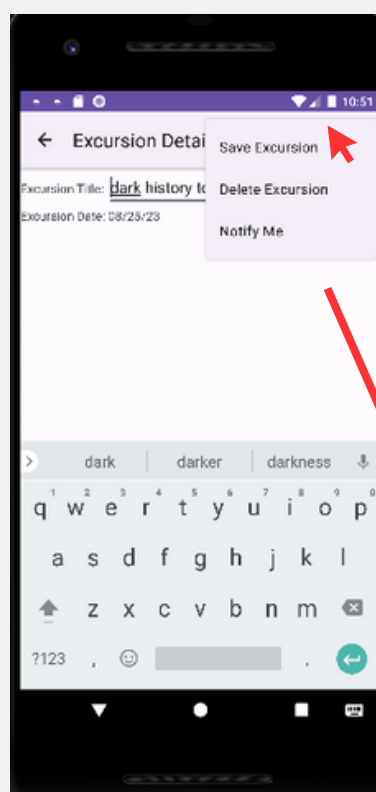

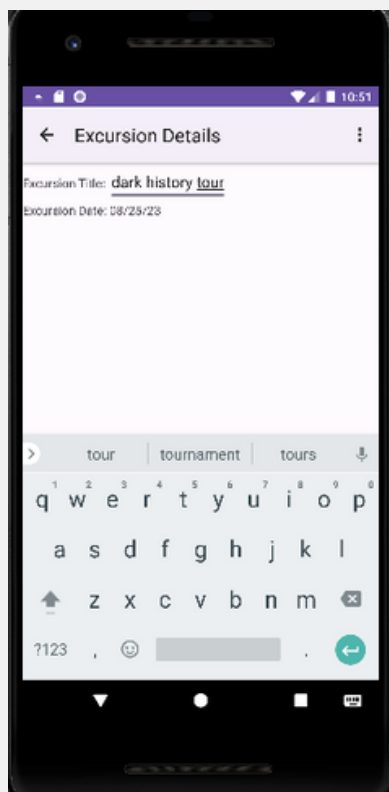

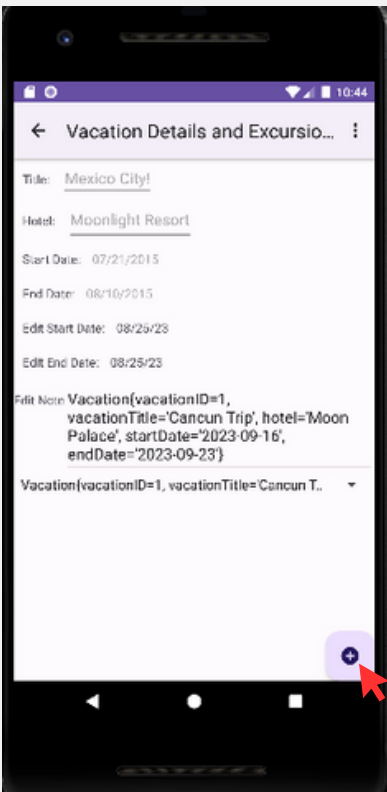

This will trigger a notification at the start/end of a vacation.

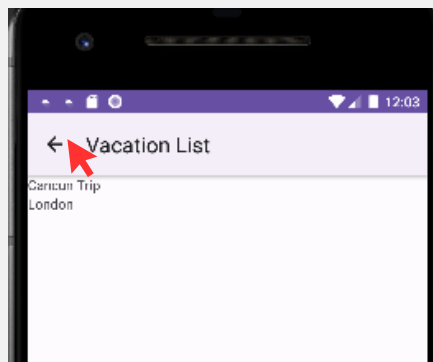

The user can use the menu to share their vacation via SMS. The user will do this by selecting which vacation they want to share, verifying the vacation information in the edit note section. The user will then click the menu, click share, and this will allow them to send the vacation information.

The user can add an excursion to a vacation by clicking the bottom right floating action button on the vacation details page. This will take them to the excursion details screen where they can add the excursion information and use the menu in the top right corner to save, delete, and notify, just as they did with the vacation.

After saving an excursion, the user will be taken back to the vacation/excursion details page where they can see their excursion under their vacation. The user can click on the excursion to edit/update the details.

The user can press the back button on any screen in the top left corner to go back to the previous page. The back button on the vacation list page will take them to the homepage.
